

INFECTION CONTROL - SAFE FOR REPTILES!

EFFECTIVE AGAINST

Broad spectrum efficacy

INTEGRATED

A range of products that gets the job done

SAFE FOR REPTILES

Sensitive enough to care, strong enough to work

SAFE FOR PEOPLE

No skin irritations, no special precautions

SAFE TO USE

Non-toxic, non-corrosive and biodegradable

F10[®] SC

VETERINARY DISINFECTANTS

WHAT IS IT ?

The **F10[®] SC Veterinary Disinfectant** is a broad spectrum product which meets the EPA's Efficacy Standard requirements for use on hard surfaces in hospital or medical environments

WHAT IS USED FOR ?

It is a high performance surface acting biocidal compound which due to its inherently low toxicity and low irritation characteristics at "as used" dilutions is used by veterinary professionals, curators, breeders and pet owners for high level disinfection of surfaces, equipment and air spaces.

For full information on the use of these products refer to product label.

HOW TO DILUTE IT

For high level disinfection use 1:250 concentration in clean water (½ oz in 1 gallon) and apply as a wash, or through a foamer, or spray/fog and leave for 10 minutes or leave to dry.

HOW LONG WILL IT LAST

F10[®] SC Disinfectants are very stable. The pack concentrate will last in excess of 3 years and the dilution up to two years.

Always replace the cap after use and keep the mixed solution in a sealed container.

F10[®] SCXD

VETERINARY DISINFECTANT/CLEANSER

WHAT IS F10[®] SCXD VETERINARY DISINFECTANT/CLEANSER ?

Has the same dilution, same actives and incipients components as **F10[®] SC** but with added surfactant to give it a light duty cleaning capacity.

For full information on the use of these products refer to product label.

F10[®]

ANTISEPTIC LIQUID SOAP

WHAT IS F10[®] ANTISEPTIC LIQUID SOAP ?

F10[®] Antiseptic liquid soap is a broad spectrum general purpose hygiene soap. It is non-irritating and has a quick (30 seconds) disinfecting action and long residual effectiveness. It is available in a pump action 500ml (17ozs) and 5 litre (5 quarts) bottles.

F919[™] SC

BIOFILM REMOVER / CLEANER

WHAT IS F919[™] SC - BIOFILM REMOVER / CLEANER USED FOR ?

F919[™] SC is used for the effective removal of biofilm harbouring a build-up of micro-organisms within the natural oil and grime deposits on hard surfaces of floors and walls.

F10[®]

HAND GEL

WHAT IS F10[®] HAND GEL USED FOR ?

F10[®] Hand gel is a waterless gel. Use one pump depression (1ml) on the hands for skin decontamination when handling reptiles to prevent cross contamination. Available in pump action 500ml (17ozs) bottles.
